PROFILE

B.Tech Computer Science and Business Systems student at Rajalakshmi Institute of Technology (2023–2027), with hands-on experience in full-stack development and projects spanning AI applications, document assistance, plant-disease classification, and sign-language recognition. Interested in building reliable software, learning from engineering teams, and contributing to practical products through the HENNGE Global Internship Program.

EDUCATION

B.Tech, Computer Science and Business Systems — Rajalakshmi Institute of Technology (Autonomous)

2023–2027 | CGPA: 7.9/10 (as last recorded)

EXPERIENCE

Co-founder & CTO — Zentrion Technologies

AI-focused software and cybersecurity initiative | Dates: add start date

- Contribute to product planning and technical architecture for software, AI-assisted workflows, and cybersecurity-oriented tools.
- Explore application design, API integration, and practical delivery of web-based products.

Full Stack Developer Intern — Aristocrat IT Solutions Pvt. Ltd., Chennai

Oct–Nov 2025

- Worked on production websites and PostgreSQL-backed applications, supporting implementation, testing, and delivery.
- Helped clarify requirements and translate them into application changes and working features.

SELECTED PROJECTS

AI Legal Document Assistant

Built a document-assistance project focused on helping users work with legal documents; involved backend/API development. Add exact features, stack, and repository URL.

Plant Disease Detection

Developed an image-classification project for plant-disease identification. Add model/dataset details and measured results only if verified.

Sign Language Recognition (GNN)

Explored a graph-neural-network approach to sign-language recognition. Add the exact input modality, dataset, and evaluation details.

Agentic Platform

Worked on backend architecture and APIs with object-oriented design and PostgreSQL. Add verified implementation details and repository URL.

TECHNICAL SKILLS

Languages: Python, C++, C, Java, JavaScript, SQL
Web / Backend: REST APIs, FastAPI, Flask, PostgreSQL, SQLite
AI / ML: PyTorch, TensorFlow/Keras, scikit-learn, OpenCV, Sentence Transformers
Tools / Foundations: Linux, Git, data structures and algorithms, OOP, DBMS, operating systems, computer networks

ADDITIONAL

Interested in open-source learning, software engineering, AI applications, and security-conscious product development. Add relevant open-source contributions, certifications, and language proficiency if applicable.
